

CFA Lecture - FRANKFURT

Rich Thinking: The Future of Women and Finance

Barbara Stewart, CFA

Partner and Portfolio Manager
Cumberland Private Wealth Management Inc.

Barbara presents her 2015 white paper: "Future of Women & Finance". Based on 50 interviews with male and female thought leaders around the world, the research uncovers five broad themes for the future of women and finance.

It is an important target of the CFA Society Germany to engage with its female membership, increase the number of female CFA Charterholders in Germany and help to counter obstacles for women in the Financial Industry. As part of this we provide room for discussion and exchange through different kinds of events, of which this will be one of the first ones.

After the presentation we will be able to continue the conversation and network around the topic with snacks and refreshments.

Barbara Stewart works with high net worth investors, both individuals and families. Barbara is also a researcher and writer on issues around women and financial literacy, publishing her fifth white paper on International Women's Day in March, 2015, the next instalment of her Rich Thinking series. As part of her work on issues of interest to women, Barbara has a bi-weekly newspaper column on women and money in over 30 newspapers across Canada.
